- Deodorization
- UV protection

※Currently, the effects of the new coronavirus have not been

Size of Mask

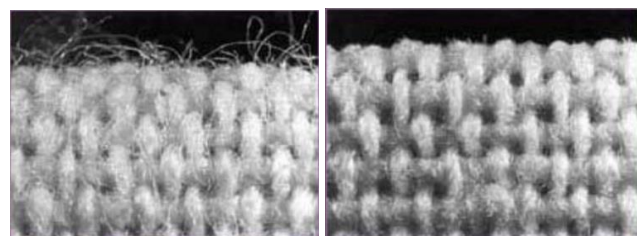

- L : 21cm × 15cm
- M : 20cm × 13.5cm

## Skin-Friendly Inner Soft Gauze (Biosilket Processing)

Cotton, which has been carefully refined and bleached, is highly hydrophilic, so it is a material rich in moisture absorption and release properties. Biosilket processing expands and gives elasticity to each fiber. The fluff on the surface of the fabric is also clean, so it feels good and has a Gentle Texture.

Each cotton fiber is swollen and has a round cross section.

Right : Biosilket processing  
Less fluff and smooth surface
